PROFESSIONAL SUMMARY

Early-career Software Engineer I – UI Developer with a Bachelor's degree in Information Science Engineering and hands-on experience in **HTML**, **CSS**, **JavaScript**, and **React**. Developed a web application that improved user experience through responsive design and integrated REST APIs, achieving a reduction in manual processing effort by **30%**. Eager to contribute to high-quality software development in a collaborative environment.

WORK EXPERIENCES

Full Stack development and management Intern | Internship — Nov 2025 - Apr 2026

Bosch India Foundation — *On-site · India*

- Enhanced and maintained **15+** website pages, improving content accessibility, navigation, and overall user experience through structured CMS-based web development.
- Engineered automated feedback processing workflows, streamlining the conversion of **200+** monthly feedback submissions into trackable action items.
- Integrated Claude AI into automated feedback analysis workflows to identify, classify, and prioritize actionable insights from unstructured user responses.
- Streamlined end-to-end workflow automation, reducing manual processing effort by **30%**.
- Designed an interactive Learning Management System (LMS) workflow prototype using Figma, mapping user journeys, system interactions, and functional requirements, while contributing to CI/CD pipelines for efficient deployment.

Technologies / Skills Used : *Microsoft Power Automate, Claude AI, Figma, javascript, Node.js*

PROJECTS

Health Deficiency Detection Web App — Feb 2025 - Mar 2025

- Developed a web application for analyzing blood reports to detect health deficiencies.
- Utilized **Next.js** for frontend and **FastAPI and Python** for backend to analyze uploaded blood reports.
- Integrated **OpenAI API** to identify deficiencies and recommend relevant foods or supplements based on the blood report.
- Enabled secure uploads, AI-driven insights, and personalized health feedback.

Technologies / Tools Used : *Next.js, FastAPI, Python, OpenAI API*

AI Rehabilitation Coach — Dec 2024 - Jan 2025

- A real-time physical therapy monitoring system that utilizes AI and computer vision to assist rehabilitation.
- Built an AI-powered system that monitors rehabilitation exercises and provides real-time corrective feedback using computer vision.
- Implemented YOLOv8 pose estimation and joint-angle analysis to detect body movement.
- Developed a Random Forest model to classify exercise form.
- Designed a WebSocket-based real-time pipeline delivering feedback within **2 seconds**.
- Integrated GPT-4 to generate personalized exercise feedback and automated progress reports.

Technologies / Tools Used : *YOLOv8, Random Forest, WebSocket, GPT-4*

Sentimental Analysis Using NLTK library — Sep 2024 - Oct 2024

- A sentimental analysis project using NLTK to evaluate sentiments from web content.
- Read data from blogging web pages, finds negative and positive parameters, and stored the results in an Excel sheet.
- Utilized Python, NLTK Library, Pandas, and Numpy for data analysis.

Technologies / Tools Used : *Python, NLTK Library, Pandas, Numpy*

My Covid Detector — Aug 2024 - Sep 2024

- A predictive model assessing COVID-19 risk levels based on a comprehensive dataset.
- Developed an ensemble model combining Random Forest, Gradient Boosting, and DBSCAN clustering to predict COVID-19 risk levels.
- Aggregated data from **over 5,000** COVID-19 case records and multiple health indicators.

Technologies / Tools Used : *Random Forest, Gradient Boosting, DBSCAN*

SKILLS

Databases :	MongoDB, Relational Databases, NoSQL
Frameworks & Libraries :	Node.js, React, Next.js, NLTK
Programming Languages :	Python, JavaScript, Java
Tools & Platforms :	Git, Microsoft Power BI, Tableau, Visual Studio Code, Azure, Tailwind, Figma

EDUCATIONS

Global Academy of Technology | Bangalore, Karnataka — Nov 2022 - Jun 2026

Bachelor of Engineering - Information Science Engineering — *CGPA : 7.7*

BASE PU College | Bangalore, Karnataka — Feb 2020 - Sep 2022

PU

CERTIFICATIONS

- **100x Devs** - MERN, Devops, System Design, Java
- **Coursera** - Introduction to Android Mobile Backend Application Development
- **UpSkill** – Software Testing
- **IBM** - Generative AI Engineering

CO-CURRICULAR ACTIVITIES

- **Co-Convenor** for the 24th VTU Youth Fest 2025, demonstrating leadership and organizational skills.
- **Treasurer** of the Inspire club in the ISE department, organized workshops and a national-level hackathon to foster community engagement.
